

SECURE

— RAZOR WIRE —

**ENSURE EFFECTIVE
SECURITY FENCES
WITH SECURE RAZOR WIRE**

BSRM Razor Wire is used for high–security purposes. As it is very hard and time–consuming to climb over a Razor Wire fence, it gives security forces enough time to take the right steps and precautions. Concertina wires come in a cyclic form; when two cyclic wires are clipped together, they form a spiral razor wire. The cyclic wires are placed one on top of another in such a way that a person or medium–sized animal cannot go through it, as there is no space between the wires.

For Commercial and Residential Security

SECURE RAZOR WIRE FEATURES:

- Hot–dip galvanized and waxed for a shiny finish
- More long–lasting than regular Razor wires
- Comes with anti–climb and anti–cutting features
- 2x better protection from corrosion

SECURE RAZOR WIRE DESCRIPTION:

Quality	
Zinc Coating	Commercial
Wire Base, mm (Yards)	2.50 (12.5)
Blade Type	BTO– 22
Blade Thickness	0.5 mm
Profiling Base, mm	450, 500, 700, 960, 1200
